

Could this work at your school?

Every school is different. We begin by listening - to school leadership, staff, families and volunteers - then explore what should be protected, what could be better and whether The School Pantry is the right fit.

Let's start with a conversation.

Building stronger school communities through food and hospitality.

More than a tuckshop.

**Part of your school
community.**

A simple introduction for school leaders

Imagine a tuckshop that...

- **children are excited to choose from.**

Food made with care, designed to be appealing and appropriate for the school community.

- **parents feel confident about.**

Thoughtful food choices, allergen awareness and professional systems behind every service.

- **teachers can trust.**

Reliable people, consistent service and a kitchen that runs quietly, safely and professionally.

- **volunteers want to be part of.**

Welcomed, valued and supported - because volunteers are part of the community, not free labour.

That's what we're here to build.

A food service that becomes a trusted part of school life.

Care in front. Discipline behind the scenes.

**COMPLIANCE IS OUR FOUNDATION.
CULTURE IS HOW WE BUILD UPON IT.**

The School Pantry applies professional hospitality systems to school food service - food safety, allergen management, Smart Choices compliance, online ordering, supplier and stock management, cost control, cleaning and sanitation, volunteer support and business continuity.

**We will never serve food that we would not
be proud to serve our own family.**
